MCP™ Patent Granted for Japan

Aurora Labs Limited ("A3D" or "the Company") (ASX:A3D) is pleased to announce it has been granted a patent in Japan for a key part of its Multi-Layer Concurrent Printing™ (MCP) technology.

Japan is a key jurisdiction due to the prominence of its major manufacturing sector and their active adoption of Additive Manufacturing. This builds on the recent granting of the MCP patent in China and is another positive step in the process toward protecting A3D's novel technology.

A3D is consistently working on a portfolio of patents covering various elements of the Company's metal 3D printing technology. Patents are at various stages of the grant process across multiple regions, including Australia and the United States.

Chief Executive Officer Peter Snowsill said;

"The granting of this core patent in another significant jurisdiction is an important step to securing our MCP technology, as protection of our intellectual property is foundational to our technology development pathway and commercialisation strategy."

Ends

Approved for release by the Company's Board of Directors.

Aurora Labs is listed on the Australian Securities Exchange (ASX: A3D)

FORWARD LOOKING STATEMENTS

This announcement contains forward-looking statements which incorporate an element of uncertainty or risk, such as 'intends', 'may', 'could', 'believes', 'estimates', 'targets' or 'expects'. These statements are based on an evaluation of current economic and operating conditions, as well as assumptions regarding future events.

These events are, as at the date of this announcement, expected to take place, but there cannot be any guarantee that such events will occur as anticipated or at all given that many of the events are outside Aurora's control.

Accordingly, Aurora and the directors cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur.
